FOUNDRY NETWORKS

BECOME A BELIEVER

Take the Foundry Networks Challenge!

Dear <FirstName>,

Today's enterprise network provides more than simply a technology infrastructure. It's an enabler for the enterprise, supporting mission critical applications, creating operational efficiencies and increasing productivity gains. While the infrastructure provides the very foundation for the organization and its initiatives, the business strategy must drive the development of the enterprise network, ensuring it supports today's requirements while evolving to meet tomorrow's demands.

Foundry's award winning solutions are proven for high density, high-performance, complete scalability, and quality to help customers address the next set of challenges in their network deployments.

Enterprise network customers can be confident that legacy applications will be supported, and will be able to take advantage of new applications including Voice, Video, and other next generation technologies that are mission critical to your business.

Foundry Networks has built a reputation for innovation high-performance networking solutions that address the needs and requirements of today and tomorrow's network infrastructures.
