Protect your IT Infrastructure from Invaders.
Introducing Security Software as a Service from Webroot.®

Attacks from spam and malware are on the rise. The cost of a single email outage due to a security breach can cost your organization thousands of dollars in lost productivity and lost sales. That is why protecting your infrastructure has never been more critical.

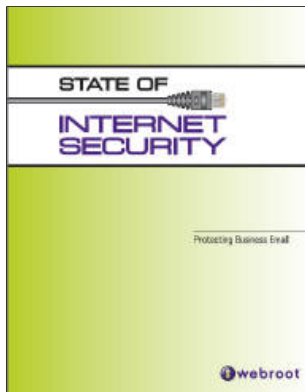

Organizations experiencing a data breach incurred costs including:

- 74% report loss of customers
- 59% faced potential litigation
- 33% faced potential fines
- 32% experienced a decline in share value *Source - Ponemon Institute Survey.*

LEARN MORE

Webroot® E-Mail Security SaaS serves as an added layer of protection by creating a larger boundary between your network and all of the spam and malware coming from the Internet. It requires no hardware or software on your part, yet provides superior protection from viruses and spam. Webroot® E-Mail Security SaaS also stores and tracks 100% of your e-mail offsite, so nothing ever gets lost and your e-mail solution automatically meets your compliance needs.

Download our **FREE** report on the **State of Internet Security**

Five scanning engines and a 99.999% uptime guarantee deliver the best e-mail security solution on the market. Best of all, it's completely painless to set it up and the most convenient solution you can deploy. Which is why Webroot has been selected to protect more than 2.5 million e-mail accounts to date.

If you want better security, easier and cheaper, get **Webroot® E-Mail Security SaaS**
