

X1 provides a single interface for secure business search, allowing you to Find, Preview, and Act on information of *any type in any location*.

X1 can Find, Preview, and Act on:

- Files and Documents on your Desktop,
- Contacts, Email, and Attachments in Outlook, Exchange, or Lotus
- Network data, whether in Databases, File Servers, SharePoint, and anything else throughout the enterprise.

X1 solutions are quick and easy to deploy and seamlessly fit into the existing technology infrastructure; even integrating with existing search technology where available.

Financial Services organizations such as Credit Suisse, Merrill Lynch, and Citibank have used award winning X1 solutions to enhance productivity and increase access to critical business information.

Being able to Find information, Preview it in full fidelity, even without the source application, and immediately take Action, all from a single, secure interface, provides significant productivity benefits and measurable ROI. Most users who try X1 can't imagine living without it.
